1 Introduction

A number of add-ons in ReluxDesktop are protected by CodeMeter (from [Wibu-Systems](http://Wibu-Systems.com)). After they have been acquired, these licences have to be connected once-only, or once a year, to a CmContainer (USB hardlock or computer).

As the first step, please install the ReluxDesktop application. For details, see Chapter 2. To activate the licence, please follow the instructions in Chapter 3 for single licences or Chapter 4 for network licences.

2 Install ReluxDesktop

Download the latest version of ReluxDesktop Version and install this.

downloads.relux.com

3 Single licences

You need an internet connection to activate the licence you have acquired either as a computer-bound licence or on a USB hardlock.

Go to codemeter.relux.com and follow the steps described there. For non-computer-bound licences, connect up the USB hardlock.

The screenshot shows the CodeMeter License Central WebDepot interface. At the top left is the WIBU SYSTEMS logo. At the top right, there is a language selection dropdown set to 'English' with a UK flag icon. Below the logo, there are navigation links for 'Home' and 'Auto Update'. The main heading is 'Welcome to CodeMeter License Central WebDepot'. A white box contains the text: 'Welcome to CodeMeter License Central WebDepot. You can transfer your licenses to your CmContainer using this WebDepot. Please enter your ticket and click "Next".' Below this, there is a 'Ticket:' label and an empty text input field. An orange 'Next' button is positioned below the input field. At the bottom of the page, there is a dark grey footer with '© WIBU-SYSTEMS AG' and a teal footer with 'Legal Notice | CodeMeter License Central WebDepot v16.12.173.500.ws'.

Enter the ticket number you have obtained from Relux and click on "Next". You will generally receive the ticket number by e-mail or in the web shop.

Available Licenses

To activate your licenses:

1. Select the licenses you want to activate.
2. Select the locally connected CmContainer to which you want to transfer the licenses.
3. Click "Activate Selected Licenses Now".

- Select the licences you want to activate.
- Select the locally connected CmContainer to which you want to transfer the licences.
- Click on "Activate Selected Licences Now"

▲ Offline activation

If the licence is to be bound to a computer without internet access, please perform the above steps on a system connected to the internet and, at the end, select **Offline-Lizenzübertragung** instead of "Activate Selected Licences Now".

4 Network licence

If you have acquired a network licence, "Codemeter User Runtime" must be installed and configured on the *licence server*. *The* licence server must have a free USB interface for the USB hardlock.

4.1 Licence server

4.1.1 Install CodeMeter User Runtime

CodeMeter User Runtime can be downloaded directly from the manufacturer's website for a number of different platforms.

<https://www.wibu.com/support/user/downloads-user-software.html>

4.1.2 Configure CodeMeter User Runtime

CodeMeter must be configured as a *Network Server*. This setting can be made via the web interface.

http://localhost:22350/configuration/server_access.html

The screenshot shows the CodeMeter WebAdmin interface. The top navigation bar includes 'Dashboard', 'Container', 'License Monitoring', 'Diagnosis', 'Configuration', and 'Info'. The 'Configuration' menu is expanded, showing 'Server Configuration' and 'Server Access'. The 'Server Access' page has two tabs: 'Server Access' and 'License Access Permissions'. Under 'Server Access', there are two sections: 'Network Server' and 'CmWAN Server'. The 'Network Server' section has radio buttons for 'Disable' and 'Enable', with 'Enable' selected and highlighted by a red arrow. Below it, the 'Network Port *' is set to '22350'. The 'CmWAN Server' section has radio buttons for 'Disable' and 'Enable', with 'Disable' selected. At the bottom, there are 'Apply' and 'Restore Defaults' buttons, with 'Apply' highlighted by a red arrow. A note at the bottom states: '(*) Changes only take effect after restarting CodeMeter'.

4.1.3 Activate the licence

It is best to activate the licence directly on the licence server. To do this, follow the instructions in Chapter 3.

4.2 Client

4.2.1 Install ReluxDesktop

See Chapter 2.

4.2.2 ReluxDesktop cannot find a licence

If the add-on in ReluxDesktop that is subject to a charge cannot find the licence that has already been activated on the server, it may be necessary to enter the IP address of the licence server into the server search list.

This is done, once again, via the web interface.

http://localhost:22350/configuration/server_search_list.html
